50	60	210		FSH pre / for ERV 50x160
65	75	225		FSH pre / for ERV 65x160
80	90	240		FSH pre / for ERV 80x160
100	110	260		FSH pre / for ERV 100x160
125	135	285		FSH pre / for ERV 125x160
150	160	330		FSH pre / for ERV 150x160
200	220	385		FSH pre / for ERV 200x160
250	265	435	340	FSH pre / for ERV 250x200
300	315	485		FSH pre / for ERV 300x200

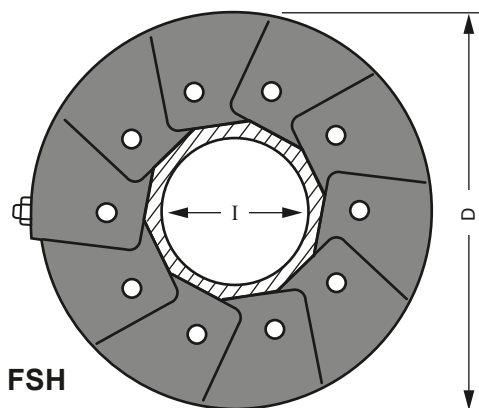

Prevedenie pre kompenzátory s prírubami podľa VG 95959-1 (Marine-Norm)

Type for ERV with flanges according to VG 95959-1 (German Naval Standard)

32	40	150	260	FSH-M pre / for ERV 32x130
40	45	155		FSH-M pre / for ERV 40x130
50	60	170		FSH-M pre / for ERV 50x130
65	75	185		FSH-M pre / for ERV 65x130
80	90	200		FSH-M pre / for ERV 80x130
100	110	220		FSH-M pre / for ERV 100x130
125	135	245		FSH-M pre / for ERV 125x130
150	160	270		FSH-M pre / for ERV 150x130
200	215	345		FSH-M pre / for ERV 200x130
250	265	395		FSH-M pre / for ERV 250x13
32	40	150	300	FSH-M pre / for ERV 32x160
40	45	155		FSH-M pre / for ERV 40x160
50	60	170		FSH-M pre / for ERV 50x160
65	75	185		FSH-M pre / for ERV 65x160
80	90	200		FSH-M pre / for ERV 80x160
100	110	220		FSH-M pre / for ERV 100x160
125	135	245		FSH-M pre / for ERV 125x160
150	160	270		FSH-M pre / for ERV 150x160
200	215	345		FSH-M pre / for ERV 200x160
250	265	395	340	FSH-M pre / for ERV 250x200

Ohňuvzdorná vonkajšia chránička pre gumové kompenzátory, je vyrobená z viacerých vrstiev tkaniny zo sklenených vlákien s vonkajším strieborným teplotne odolným povrstvením silikonom s hliníkovou pigmentáciou (certifikované podľa MED A1/3.13). Skrutky, matice a podložky z mosadze. Spoľahlivo chráni gumové kompenzátory pred sálavým teplom a priamym ohňom do teploty + 800°C počas 30 minút (ISO 15540). Chránička je odolná voči olejom a chemikáliám, je odolná voči starnutiu a vonkajším poveternostným vplyvom.

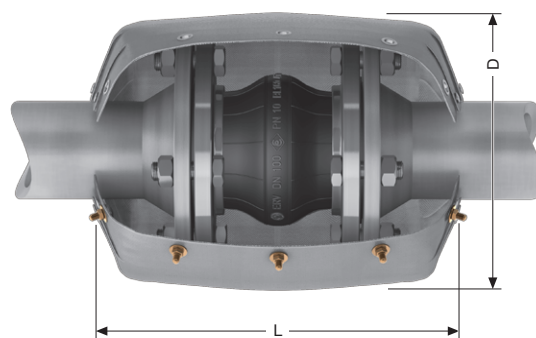

Forma chráničky umožňuje jej dodatočnú montáž a demontáž podľa potreby. Rozmery chráničky sú navrhnuté tak, aby boli chránené aj protipríruby kanála bez obmedzenia pohybov kompenzátora.

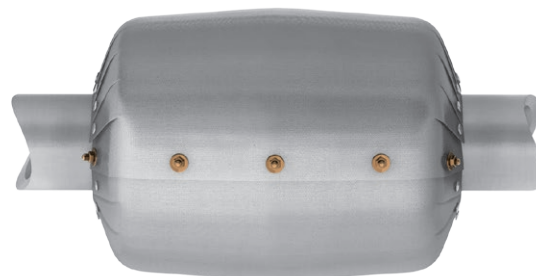

Typ FSH

Flame protection cover for ERV rubber expansion joints, made of several layers of glass fiber fabric with a surface cover of silver-coloured high temperature resistant silicone-aluminium-glass fabric (certified acc. MED A1/3.13). Screws, nuts and washers of brass. It reliably protects the expansion joint against radiation heat and direct flames up to +800°C for 30 minutes (ISO 15540). The flame protection cover is resistant against oil and chemical influences as well as against ageing and weathering.

Because of its split design the flame protection cover can be mounted subsequently or re-opened. The dimensions have been chosen in such a way that also the counter flanges are completely covered. The allowed range of movement is not restricted.
